

Advancing Industry 5.0 in the European Furniture Sector

Industry 5.0 places people, sustainability and resilience at the heart of smart manufacturing. This online event brings together European stakeholders to explore the furniture sector's maturity level, practical use cases and emerging skills needs. As the final event of the FURN5.0 project, it presents key project results, including a comprehensive Handbook featuring 15 practical applications and a Self-Assessment Tool designed to guide companies towards effective Industry 5.0 implementation.
